SUMMARY

Full-Stack Web Developer with close to two years of experience, including one year in a full-time React.js role, building secure, scalable web applications using the MERN stack. Shipped production features for fintech platforms handling cross-border transactions, and contributed backend work to a multi-language code execution engine supporting 9 programming languages. Comfortable working across the stack including UI, API integration, and database design, and quick to adapt to new domains.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML5, CSS3.
- **Backend:** Node.js, Express.js, PHP.
- **Languages:** Python
- **Databases:** MongoDB, SQL.
- **AI Tools:** Claude, Cursor, Github Copilot
- **DevOps & Other Tools:** GitHub, Postman (API Expert), Canva.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Web Developer | April 2026 – Present

- Revamped and modernized legacy web applications, redesigning the frontend and enhancing backend functionality using PHP, MySQL, HTML, CSS, and JavaScript.
- Successfully delivered the Wilson College website and currently developing another client project, managing the full development lifecycle from implementation to deployment.

Fable Fintech | React.js Developer | April 2025 – April 2026

- Developed and maintained secure, responsive web applications for international banking and fintech platforms.
- Contributed to cross-border money-transfer products (Axis Remit Money, DTBK Bank Remit Money), building UI and API integration for real-time transaction flows.
- Optimized frontend performance to improve load times and responsiveness.

Mgrid Technologies | Full-Stack Developer | July 2024 – April 2025

- Built a job portal end-to-end using the MERN stack, covering listings, applications, and a recruiter-facing dashboard.
- Collaborated with the team on coding standards and integration practices to keep development consistent across the codebase.

PROJECTS

SecureVote (Blockchain Voting Portal) | Jan 2026 – March 2026

- Architected an online voting system with blockchain-based verification for transparent, tamper-proof remote elections.
- Implemented OTP authentication, role-based access, and location-based user segregation.
- Added real-time monitoring and multi-layer security checks to flag unauthorized access attempts.

Tech: React, Node.js, PostgreSQL, Blockchain

Grammar Checker Libs (React Library) | Aug 2025 – Oct 2025

- Built and published a reusable React library for real-time grammar checking in web apps.
- Integrated a Java LanguageTool backend with a Python server for fast, privacy-friendly error detection.

Tech: React, Python, LanguageTool

Coding Ground (Multi-Language Code Execution Platform) | Dec 2024

- Contributed as a backend developer on a team project, building compiler/interpreter integration for 9 languages (C, C++, C#, Java, Python, JavaScript, R, Go, Rust).
- Worked with the project creator and team to design the execution pipeline for safely running and returning code output

Tech: Node.js, Express.js

InstaAmi (Social Media Platform) | Dec 2023 – Feb 2024

- Worked as a full-stack developer on a community-driven MERN-stack social platform (team project), handling both frontend UI and backend functionality.
- Independently designed and built a separate MERN-stack admin panel for role-based platform administration.

Tech: MongoDB, Express, React, Node.js

EDUCATION

- **Master of Science in Computer Science** | S.I.E.S. College of Arts, Science and Commerce | (2024 – 2026)
 - **Bachelor of Science in Computer Science** | S.I.E.S. College of Arts, Science and Commerce | (2021 – 2024)
-

CERTIFICATIONS

- **Software Engineering Job Simulations:** J.P. Morgan & Walmart.
 - **API & Backend:** Postman API Student Expert, Node.js & Express (GDSC).
 - **DevOps:** Learn DevOps for Web Development (AWS).
 - **Python:** The Joy of Computing Using Python.
-
